

GLOSSARY

A Practical Glossary

CHAPTER ONE

The Alternatives Space

The Alternatives Space is an infinite metaphysical informational structure. It contains all versions of all events currently materialized or up for possible materialization into the physical world. The Alternatives Space is a grid of matter moving through space and time, which contains everything that ever was, is and will be. Everything originates from this grid.

Our world exists simultaneously in two forms: The Physical Reality (everything we can touch with our hands) and The Metaphysical Alternatives Space (the energetic equivalent of everything material), which is located just outside of perception, but is just as objectively real.

The mind does not generate anything “new” per se. Rather, it accesses knowledge via The Alternatives Space. All scientific discoveries, masterpieces of art, languages and ideas are received from this space.

An individual with Heart and Mind Coordination experiences the greatest ease with accessing The Alternatives Space. The deeper you connect to The Alternatives Space, the more capable you will become at materializing favorable variations in waking reality.

Since I mentioned waking reality, let me note here that dreams (the ones we have at night, asleep) are not illusions in the classic sense; The mind does not invent dreams – it experiences them. During sleep, we gain access to unmaterialized variations, i.e., alternate versions of scenarios and scenery. Dreams do us the magical service of showing us the myriad of potentials available to us. Dreaming is a journey of the soul, flying unhindered through The Alternatives Space at night.

Why do you think new experiences in waking life often feel “dreamy”?

Variables

The infinite conditions that exist in The Alternatives Space. Variables are people, places, things, variations of and alternate scenarios. Basically, anything you could ever imagine exists as one data point in the infinite datasphere that is The Alternatives Space. To materialize the world you want to enjoy, you must identify the Variables that exist within it, and then pull them toward you and move yourself toward them using the Four Mechanisms of Commanding Your World.

Coordinates

The location of a given Variable within The Alternatives Space.

Theory (Step One of The Four Mechanisms)

To effectively command your world, you must first choose a Theory that affirms the existence of the world you want to live in. Without thoroughly completing this first step, the following three will be rendered useless. Say for example that you seek wealth. You could align your thoughts, actions, and frequency to a wealthy version of yourself but if you’re still unconsciously carrying around a deep-seated belief – or Theory – that you don’t deserve wealth, nothing will change. This is because your Theory subtly directs everything you do, which in this case would make it impossible to find the right frequency, maintain the right thinking, or take the right action to achieve your goal. Negative theories cloud our vision, making it difficult to see clearly which opportunities, directions, and steps will move us toward our ideal Lifetrack.

Lifetrack

The human life is experienced as linear but is simply matter in motion creating chains of cause and effect. The collective “effects” assemble into a Lifetrack. The set, decorations and props of a given Lifetrack (people, places, circumstances, and material objects) form in correspondence to thought quality, action, and frequency.

Life moves evenly along its track until an event, or a shift in thought, action, or frequency, introduces a substantial change to the set and decorations. If the change is significant, we will experience a shift that crosses us over to a different Lifetrack. You are always on a Lifetrack; the parameters just correspond to your emissions.

By changing your attitude toward the world – that is your thought image – you can shift Lifetracks and gain access to alternatives that may not have been available to you on your previous Lifetrack.

Material Realization

Data within The Alternatives Space materializes under certain conditions. Every object now in the physical world first existed within The Alternatives Space. Materializing from the Alternatives Space into the physical world begins with thought energy. Your mental broadcasts actualize data from a given sector and unlock ideas, inventions, and images. This may feel like an “epiphany”, but really you are just gaining access to a new sector of The Alternatives Space.

Thoughts have unequivocal dominion over the flow of events. The Alternatives Space serves as a grid of data and determines the way matter is allowed to move. You can set this matter in motion by changing your coordinates and relocating to the parameters of the vector you want to experience.

Induced Transition

A series of unfortunate occurrences, information and circumstances that send the individual experiencing them on a plummet to lower levels of reality. The Induced Transition is initiated when an individual focuses their attention on a negative event and in doing so, exponentially materializes more negative events. Continued attention and energy will cause the frequency of negative events to accelerate faster and faster, finally leading to a climactic event and the dispersion of all that built up energy into the Alternatives Space. This is followed by a temporary calm. Also referred to as the “Wave of Misfortune.”

Becoming captivated by Pendulums that display lifelines heavy with disaster, war, poverty, and violence, can cause the onset of an Induced Transition. Respond to the first prod of the Pendulum and you will become emotionally hooked. For example, say you tune into a negative event and allow it to trigger a strong emotional reaction in you. In so doing, you’ve participated in the creation of a downward spiraling vortex and will be taken down in the process.

Characteristics of an individual who has become absorbed by a negative vortex may include victim mindset, depression, anxiety and feeling agitated with the world. The frequency of these emotions corresponds to lower levels of reality. Negative external circumstances may cause an individual to continue feeding the negative vortex with thought energy, satisfying the Pendulum's intentions to disable and confuse you for the purpose of energy extraction. Consequently, your reality becomes created by external Pendulums.

Imagine a downward spiral leading to rock bottom where your vital life forces are ceaselessly harvested by ambiguous forces for ambiguous purposes.

Wave of Fortune

A series of fortunate occurrences, information and circumstances that send the individual experiencing them skyrocketing to higher levels of reality.

The Wave of Fortune is initiated when an individual focuses their attention on a positive event and in doing so, exponentially materializes more positive events. Continued attention and energy will cause the frequency of positive events to accelerate faster and faster, finally leading to a climactic event and the dispersion of all that built up energy into the Alternatives Space. This is followed by a temporary calm.

Highlighting the positive in your external environment, or your “first win”, initiates this phenomenon. You tune into a fortuitous event, allow it to affect your thought energy and off you head, upward to higher Lifetracks. The phenomenon of absorption into the positive vortex is characterized by feelings of luck, happiness, accomplishment, and satisfaction with the world.

Imagine an upward spiral leading to your ideal version of reality. This upper Lifetrack contains all the material things, experiences, and sensations that create meaningful to you personally.

Transurfing

Intentionally navigating through The Alternatives Space, materializing Variables at will, or intentionally moving to Lifetracks that are suitable and pleasurable for you as an individual.

Soul Fraile

The unique code that corresponds to your individual soul. Tuning to the Fraile of your Soul is the antidote to environmental programming, imposed “wants” and “shoulds” of others, and the version of you that’s been tailored to suit the standards of Pendulums.

Align with your Soul Fraile and you will become a lucid embodiment of your TRUE individuality. Tuning in will bring out all your purest characteristics. This is you doing the things you love with Heart and Mind Coordination and journeying along the Lifetrack specifically intended for you.

When you are properly tuned to the Frailty of your Soul, you resonate at a frequency that corresponds to the ideal sector of reality for you, where everything you desire exists.

Pendulums

Amassed human mental energy creates these aggressive, invisible thought structures. When a group of people focus their collective attention in one direction, their “thought waves” aggregate into a mass of energy. These covert, but very real energy-information structures create Pendulums. Pendulums develop on their own accord and create laws and standards to which their victims must adhere. Under the influence of a destructive pendulum, one loses their personal creative freedom by becoming a cog in the machine. The more people/fans/members participating in this one-sided energy exchange, the stronger the Pendulum will become.

Every Pendulum has its own characteristic frequency. The Pendulum’s objective is to affect an environment’s frequency enough that humans feel pulled to focus on them and feed them with more energy. Once a human’s frequency has been affected, their thoughts and actions will obviously follow suit. The resulting thoughts, actions and frequencies then correspond to a sector of reality where the Pendulum dominates.

It is impossible to Transurf a reality that is being created and controlled by a destructive Pendulum. In succumbing to the destructive influence of a Pendulum, an individual runs the risk of becoming forcibly diverted away from Lifetracks where they experience happiness.

To suck energy from their adherents, Pendulums captivate humans by way of their feelings and reactions. They do this by triggering strong emotions like resentment, dissatisfaction, hatred, frustration, anxiety, agitation, oppression, confusion, despair, fear, regret, affection, admiration, tenderness, idealization, adoration, delight, disappointment, pride, arrogance, contempt, disgust, sense of offense, sense of duty, guilt, etc.

Classic pendulums include: the media (including social media), politics, religion, professionalism, fashion, pharmaceuticals, alcohol industry, etc.
